

PROFESSIONAL SUMMARY

Machine Learning & Data Scientist with hands-on experience of 2+ yrs building, validating, and deploying **machine learning, deep learning, and computer vision** models across **e-commerce, fintech, and quantitative research** including a **multi-label image classification system** achieving **90%+ accuracy on 70,000+ product images**, and **35+ statistically validated predictive models** tested across **300+ hypotheses**, improving **model hit rate by 13%** and **inference latency by 20%**. Proficient in **Python, SQL, PyTorch, TensorFlow, Scikit-Learn, and Hugging Face Transformers**, with applied experience in **credit-risk modeling (32,500+ records)**, **time-series forecasting (ARIMAX/SARIMAX)**, and **generative AI/semantic search (LangChain, FAISS)** translating complex, multi-source datasets into deployed, decision-ready systems.

WORK EXPERIENCE

Co-Founder & Data Lead | BeyondTech - Early-Stage EdTech Platform | [Website](#) **Dec'24-Present**

- Built and deployed an **LLM-powered learning platform** serving **2,000+ users**, leveraging **Hugging Face Transformers, NLP, RAG, and Python** to automate assessments and personalized AI-driven feedback.
- Engineered **machine learning pipelines** for **1,800+ qualified leads per cohort**, integrating feature engineering, predictive analytics, KPI tracking to improve paid conversion to **30%**, generating **₹20L+ revenue per cohort**.
- Developed scalable **Generative AI** workflows using **LangChain, FAISS, embedding models, and prompt engineering**, reducing content-production costs by **75%** while accelerating product iteration.

Financial Market Analyst | [Futures First](#) | [LOR](#) **Jan'25-Present**

- Developed and evaluated **35+ predictive machine learning models** using **Python, Scikit-learn, and statistical techniques** across **300+ hypotheses**, improving **model hit rate by 13%** and **reducing inference latency by 20%**.
- Built predictive analytics models leveraging **time-series forecasting, macroeconomic indicators, volatility, and market microstructure data**, generating **150+ actionable trading strategies** for **\$100K proprietary trading portfolio**.
- Designed automated analytics workflows and monitored **12+ trading KPIs** using **Python, SQL, and advanced Excel**, improving trade-selection efficiency by **50%** while supporting data-driven investment decisions. combining macroeconomic indicators, volatility and trading data to generate **150+ actionable strategies weekly**.

Summer Associate & Data Analyst | Nation with Namo | [LOR](#) **Jun'24-Aug'24**

- Built interactive **Tableau** dashboards from **32,500+ environmental records**, performing **data preprocessing, cleaning, feature engineering, and exploratory data analysis (EDA)** to reduce manual reporting effort by **60%**.
- Applied **statistical analysis** and data visualization techniques to identify trends across six pollution sources, translating analytical insights into recommendations for **15+ government, research, and industry stakeholders**.
- Collaborated within an **Agile** cross-functional team using **JIRA**, supporting experiment tracking, reporting automation, and iterative analytics delivery while maintaining **95% sprint completion**.

PROJECTS

Meesho QuickTag | Computer Vision & Deep Learning| [Deployed Project Link](#) **Aug'25**

- Developed a **multi-label computer vision system** using **PyTorch, Hugging Face Transformers, and Phi-3.5 Vision**, training on **70,000+ product images** across multiple fashion categories, achieving **90%+ attribute prediction accuracy** while eliminating null-value predictions.
- Engineered an end-to-end **deep learning pipeline** covering image preprocessing, augmentation, feature extraction, model training, hyperparameter optimization, and inference optimization, improving prediction latency by **35%** and model robustness across diverse product classes.
- Built and deployed a production-ready **Streamlit inference platform**, enabling real-time image classification and automated catalog enrichment, reducing manual product-tagging effort by **80%**.

CrediScope AI - Credit Risk Analytics & Loan Default Prediction | [Deployed Project Link](#) **May'26**

- Developed and evaluated **classification models** using **Scikit-learn** on **32,500+ financial records**, performing feature engineering, preprocessing, cross-validation, and model selection to predict customer credit risk.
- Built an explainable ML workflow incorporating **Logistic Regression, Random Forest, XGBoost**, and performance metrics including **ROC-AUC, Precision, Recall, F1-score**, improving predictive performance and supporting risk-based lending decisions.
- Designed an interactive prediction dashboard for real-time credit assessment, integrating model inference, probability scoring, and business-friendly visualizations for decision support.

EDUCATION

B.Tech : Netaji Subhas University of Technology, Delhi: Information Technology, **8.95 CGPA, Dept. Rank 1, CVSPK Scholar**
Class XII: Kulachi Hansraj Model School, Delhi: **CBSE, 95.4%, Scholar Badge recipient for 7 consecutive years**

POSITION OF RESPONSIBILITY

Vice-President: Nakshatra | The Astronomical Society of NSUT **Jul'23-Jul'24**

- Served as the primary organizer** for the Triathlon event, coordinating **150+ participants**, generating over **80K** social impressions, securing **10+ sponsors (GAIL & Boat)**, contributing to a record-breaking **1,000+ registrations** for Resonanz.
